

Nguyen Minh Nhat

Game Designer

Ho Chi Minh City, Vietnam | +84 931 877 862 | nmnguyengamedesign@gmail.com | [LinkedIn](#)

Professional Summary

Final-year Bachelor of Design (Games) student at RMIT University Vietnam with hands-on experience in gameplay design, combat systems, level design, Unity development, playtesting and balancing across collaborative game projects. Skilled in Unity and C# programming, with additional experience in Aseprite, Blender and game research. Research and game projects have been featured on the RMIT Vietnam Showcase. Seeking graduate Game Designer roles, with additional interest in QA/Game Testing and Game Development.

Skills

Game Design & QA

- Gameplay Design
- Combat Design
- Level Design
- Prototyping
- Playtesting
- Game Balancing
- QA Testing

Software & Programming

- Unity
- C# Programming
- Aseprite
- Blender
- UI Implementation
- Audio Implementation

Soft Skills

- Team Collaboration
- Problem Solving
- Communication
- Feedback & Iteration
- Research & Analysis
- Documentation

Game Design Experience

Road from Fed-up to Hero - Gameplay Programmer & Game Designer

RMIT University Vietnam | Completed: Apr 2026

Skills/Tools: Unity, C#, gameplay mechanics, UI implementation, audio implementation, playtesting

- Programmed core mini-game mechanics for a 2D pixel-art puzzle game combining educational challenges with narrative progression.
- Implemented UI and audio, then playtested and iterated mechanics to improve usability, pacing and player flow.
- **Result:** Delivered a playable build and submitted the project to the RMIT Vietnam GDS5 Semester 1 2026 "Feelings" game jam.

Game Design Experience (continued)

The Academic Research of The Sims Franchise - Game Research Contributor

RMIT University Vietnam | Completed: Aug 2024

Skills/Tools: Game research, comparative analysis, player-behaviour analysis, academic writing

- Conducted approximately 30% of the team research and comparative game analysis for an academic study of The Sims franchise.
- Analysed changes in game design, learning curves, social dynamics, world-building and audiovisual design across the series.
- **Result:** Synthesised findings into a collaborative research project featured on the RMIT Vietnam Showcase.
